FLOMAX™
HARP SCREENS ANOTHER QUALITY **AEG** PRODUCT

FloMax™ - Poly

Advanced Engineering Groups Harp/Piano screens with poly strips. We manufacture the polyurethane stringers to suit any machine set-up. We supply almost any specification from our standard piano wire screen list, within the following limits:-

- Apertures between 1.5mm – 46.0mm
- * Polyurethane Hardness – 85-90 Shore
- Wire thickness between 1.2mm – 8.0mm
- Max length – 1800mm (along the hook)
- Max width – Unlimited O/H (over hooks)

*High Tensile & Stainless Steel Wire Available

All FloMax™ - Poly screens are factory tested and are designed to maintain a 'True' aperture. We are also able to vary the hooks to suit all tension bar setups.

Benefit of using polyurethane over plastic or steel spacer is it can withstand more impact and the wear life around the stringer/spacer area is 2-3 times greater.
